Abstract Details: 6 of 50
Authors: Logan, H M
Title: Electronic lexicography.
Journal: Comput. Humanit. (Netherlands), vol.25, no.6, Dec. 1991, 351–61
Class: C7820 C6160 C7240
Date: 1991
Keywords: Machine–readable dictionaries; machine readable lexicons; machine readable dictionaries; linguistic information; selected information; lexical databases; lexical information; OED; diachronic lexical database.
Abstract: A brief survey is given of some important developments in the use of computers in making dictionaries and lexicons. Making a dictionary involves collecting the data, sorting and lemmatizing, editing and printing. Five major types of machine–readable dictionaries have developed
